

BIKE BOARD SPECS.

FILE FORMATS

Format: PDF preferred

FILE SETUP

1:10 scale (10% of the final print size)

When designing art for Bike Boards you can either include a minimum 50mm gutter in between each panel or have distinct panels which join up on each apex. Please contact our team if you would like to see examples of each design approach.

- Include 5mm of bleed (50mm at final print size)
- All images should be min 300dpi when placed
- Convert ALL fonts to outlines
- All overprint/trapping options should be turned off
- Do not use ASCII encoding for EPS files, use Binary only
- All files must be supplied CMYK not RGB
- Set all solid black to C 20% M 20% Y 20% K 100%

BACKLIT ART

Bike Boards can be backlit for maximum impact at night. Your artwork will need to be designed to avoid 'show-through' from the support poles. To optimise your artwork for backlighting contact our team.

USING EXISTING ARTWORK

Already got 3:2 poster artwork? Just send us your files and we'll do the rest. Or if you would prefer to tailor your artwork contact our team.

DECALS

Want extra branding? No problem, we can apply decals directly to the capping at the top as well as the back and sides of the Bike Board at the base. Contact our team for more information.

W 835mm x H 1200mm W 670mm x H 1200mm W 835mm x H 1200mm

Trim size: W 2340mm x H 1250mm
Visible area: W 2340mm x H 1200mm
File setup: 1:10 scale (10% of final size)
W 234mm x H 125mm
